## WE ARE PROUD TO CELEBRATE OUR 4<sup>TH</sup> ANNIVERSARY

Just four years ago Anthelion Helicopters was born. Starting out in a 400 Sq. ft office with three members and one R22. Fast forward to present time, we now have four full time pilots as well as three part time pilots and knowledgeable ground personnel. For four years, we are proud to produce incredible pilots who have gone on to do amazing things such as EMS, tours in the beautiful Grand Canyon, charters, and fly fixed wing aircrafts just to name a few. We are also proud to provide breathtaking sightseeing tours, charters and photography flights, not to mention cinematography and parachuting. You can imagine how ecstatic we are about our continuous growth and progress. Keep an eye out for what we will do next, the sky's not the limit here at Anthelion Helicopters.

## EXTRA! EXTRA!

Adding to our progress, we are happy to announce that we are now Part 141 FAA approved, bringing an extra level of quality assurance to our training! If you are looking to start or expand your piloting skills ask us how, we're here to help.

Please stay tuned for our upcoming Immersion Packages. Have you done an introductory flight with us and are unable to commit to a full license, for whatever reason? We have packages just for you! We have created four different bespoke training experiences each designed with a specific skill development. You'll be able to purchase these either as a gift or for yourself, and the hours obtained will always count towards your full license if you choose to do it in the future.

If you want to experience the next great thing in aviation, come by and fly the Guimbal Cabri G2 in an introductory flight. This state of the art helicopter is the newest addition to our fleet of helicopters and we can't wait to show you how to master it. Simply give us a call and schedule a flight, you will not be disappointed.

*We are proud to congratulate our newest graduate Farida. With hard work and dedication, she overcame the obstacles and received her commercial license with Anthelion Helicopters. We look forward to see where this well-deserved accomplishment takes her!*

*Chris Guenther (seen on the left) completed his Private, Commercial and Instrument training with us. He is now our newest CFI, training potential pilots just the way he started. Chris embodies what we are proud to produce here at Anthelion Helicopters; Knowledgeable, well trained pilots who can go on and be the best in their endeavours. Welcome to the team Chris, we're proud to have you!*
